Barbara,

Forgive me as I forgot to send this to you when I sent it to Dean. I am also sending Dean another little update regarding my operators and there continuing education and certification training and testing.

I currently have one operator in training for his intro to wastewater in Rice Lake Wisconsin.
I have another operator scheduled to take training for phosphorous removal the third week of September in Tomah Wisconsin.
Both these operators will be in Chippewa Falls Wisconsin at the end of October taking their activated sludge training. Testing for certification will be the first Wednesday of November so I anticipate that collectively we will have certifications in wastewater, activated sludge, phosphorous removal and ponds and lagoons.

Hard copy to follow.

Compliance Update:

WWTP CONTROLS UPDATE

Mechanical portion of the bid package has been let and will end on Sept. 5th. There has been some interest from contractors who have toured the plant. I will be reviewing all bids with IHS and I will bring to the Tribal Council a recommendation by the end of the month. I anticipate construction to begin in early October.

BAD RIVER MANAGERS POSITION

The first round of applicants (2) were not qualified in the least. I have changed some wording around that will make the position more appealing and will hopefully yield some more applicants. I have sent an email last week to the human resources manager (Gerald White) asking for an update but at the time of this email I have not received one. I will email you as soon as I find out where we are with this.

SAMPLING

We have completed all of our 2013 required sampling for the year but are still waiting for the results from our Rads testing and Lead & Copper. When these are received I will forward them on to the correct EPA representatives as usual.
